FOUNDATION**

**Wessex Water**  
YTL GROUP

**FOR YOU. FOR LIFE.**

# The Wessex Water Foundation

The Wessex Water Foundation funds projects that strengthen communities and benefit the environment, while also providing local groups and charities with volunteering support.

It has never been more important to both respond to the needs of our communities and make a firm commitment to support them for the long-term future, and the Wessex Water Foundation allows us to do just that.

The Foundation was launched in 2020 in partnership with the Somerset, Wiltshire, Dorset and Quartet Community Foundations, which help to ensure our funding goes towards the communities that are in most need of support.

This report shows the impact of our grants and the projects supporting across our region from April 2022 to March 2023.

# Funding overview

Programme	Grants	Direct Beneficiaries	Indirect Beneficiaries	Amount

# About the Community and Environment Funds

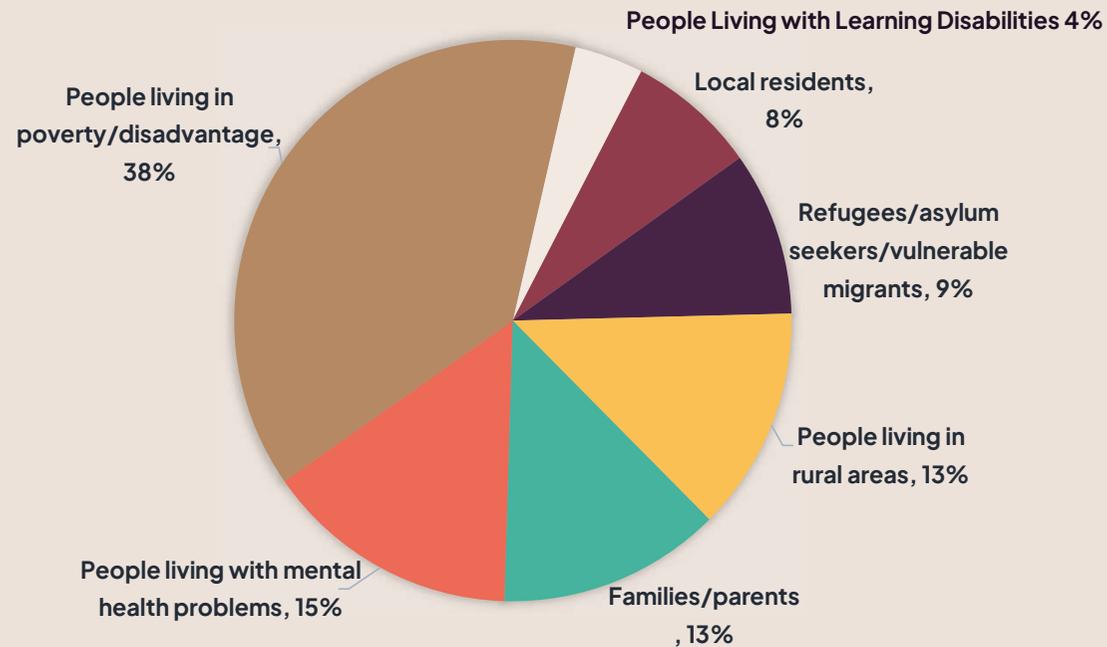

The Wessex Water Foundation's Community and Environment Funds are both open grants programmes, with local charitable and community groups and organisations able to apply for grant funding from our four local Community Foundations: Dorset, Somerset, Wiltshire, and Quartet (covers the old county of Avon).

The **Community Fund** supports community-based activities or projects that meet a local need and seek to improve the lives of local people who are most in need of support.

The **Environment Fund** supports activities that improve local biodiversity or have a positive impact on the local environment for local people. Priorities for this programme are activities that are reducing water use, improving environmental sustainability in the local area, and/or improving local biodiversity.

# Analysis of Community Fund grants

## Who Benefited

# Analysis of Community Fund grants

## Top 5 issues

- Poverty & Disadvantage 21%
- Mental Health 20%
- Isolation & Loneliness 16%
- Food Poverty 10%

TOTAL			<b>£176,745</b>

## Case Study: Mothers for Mothers, Bristol – awarded £1,465 in December 2021 from the Community Fund towards delivering weekly peer support groups for women affected by mental ill health

“The grant has enabled us to keep existing peer support groups open and given us freedom to be successful in obtaining funds for new groups. It also enables us to work with children. Maternal Mental illness can impact on a woman’s ability to be sensitive and responsive in her parenting. By working with women and their children together in group we are able to encourage sensitive and responsive interactions as well as supporting faster recovery both of which lessen the impact of the illness on children’s emotional development.

The feedback from clients shows how important this element of the work is in enhancing their relationships with their children. Our work with Children ensures the children are emotionally well, they socialise/play with others and have more fun. The children have more positive relationships. We work with the Mother to better understand her child's needs and be more sensitive/responsive in her parenting which establishes and strengthens bonds. By strengthening this relationship at such an early stage the child will be more likely to form positive relationship with others as they grow.”

## Case Study: Hope Housing ,Training and Support, Dorset – awarded £2,290 from the Community Fund in 2021 towards weekly cooking activities.

Life skills are lacking greatly in our residents and due to homelessness and bad life choices they already have long term ailments. We arranged group cooking activities across our houses, providing food, sharing skills and teaching residents how to make healthy meals on a budget and promote the social benefits of eating together.

Cooking together helps them bond with their house mates, helps them learn skills from each other and helps them budget for food costs more realistically. It also helps with anxiety, boredom, isolation and loneliness, improving their overall wellbeing. We had some problems with anxiety over working together in close proximity but we dealt with this by letting people just watch or eat the food at the end, until they felt reassured to join in.

Thanks to the evidence we have gathered we have been able to apply to the Healthy Heart Grant and I am thrilled to say we have been accepted with a further grant of £10,000 in 2023 to continue this project plus other activities which improve the heart and life of residents.

# Environment Fund Grants (Quartet)

Organisation	Project description	Location	Amount
148th Bristol (1st Stockwood) Scout Group	Water butts and hoses around HQ building to enable water harvesting. Gardening tools to enable completion of the gardeners badge work for all sections.	Bristol, City of	£500

The Friends of The Marden Valley	Water Vole survey and Tree planting along Abberd Brook	Calne	£1,500
TOTAL			<b><u>£72,170</u></b>

## Case Study: Root Connections, Somerset – awarded £1,500 from the Environment Fund in 2021 towards teaching children about beekeeping, pollinators and the environment

“We have been able to purchase junior bee suits, educational resources & candle making equipment. We were then able to confidently showcase our bees & related produce; honey, candles etc. at our Open Day back in October, run educational sessions for adults, children & beneficiaries with specific learning needs & sell our candles at our (first ever!) Christmas Market. We're hoping to organise school visits in 2022 when the risk of Covid eases & plans are being made for the Easter & Summer terms.

One of our volunteers has found this last year particularly challenging. CD is deaf & has found Covid & face coverings very difficult. Added to this, CD is going through a divorce & has had to move house. In the midst of all of this CD has found great solace in helping our resident bee keeper look after the bees & has since signed up for a bee keeping course, has been busy learning to make candles, harvested this year's yield of honey & helped organise workshops & ran the Bee stall at our open Day. CD has already expressed an interest in running educational workshops next year & has said the bees have sustained her through a very difficult time in her life & so grateful for all the new friends she has made.”

## **Case Study** :Wiltshire Bat Group - awarded £1,483 from the Environment Fund in 2021 to help with their South Wiltshire Greater Horseshoe Bat Project.

Our main objective is to promote bat conservation in Wiltshire. We do this by carrying out bat surveys and research projects across the county, while also working in partnership with other organisations and training the next generation of bat ecologists. We launched this project in the autumn of 2020 to increase greater horseshoe bat populations in south Wiltshire.

To achieve this, we have been supporting local communities to improve land management and population monitoring. The greater horseshoe bat is one of the rarer bat species in the UK and it is largely restricted to south west England and South Wales. As this species recovers after declining in the twentieth century, it's important we monitor them to ensure we are taking the necessary steps to increase their conservation status.

# Community Connectors

For the first time Wessex Water is aiming to work with whole communities to identify and tackle a number of shared environmental and social goals together. Wessex Water chose Chippenham and Bridport as their first communities, one being urban and one coastal. In both pilot areas Wessex Water has established a local advisory group to help them work with the wider community. Through a series of community engagement activities, Wessex Water have agreed their shared priorities for change and are co-designing projects to tackle them.

This year, through a combination of Wessex Water and community led projects, funded through the Wessex Water Foundation, they will deliver improvements to the environment and the lives of local people and make progress towards achieving our shared goals. You can find out more about the project here [Community Connectors | Wessex Water](#).

In March 2023, in partnership with Dorset Community Foundation and Wiltshire Community Foundation, Wessex Water ran two community-led panels to award funding to groups in Chippenham and Bridport, and the funded projects are below:

Programme	Grants	Amount
Chippenham	7	£37,420
Bridport	6	£29,210
<b>TOTAL</b>	<b>13</b>	<b>£66,630</b>

# Community Connector Grants - Chippenham

Organisation	Project description	Amount
Bristol Avon Rivers Trust (BART)	Split across two applications: Funding would bring their established Yellowfish Project (community education about contaminated wastewater) and Riverfly monitoring project (river quality) to Chippenham.	£2,500 & £1,800 (1 year)
Chippenham Community Hub	Funding will help with the cost of upskilling the manager and volunteers to provide better information and signposting during the cost-of-living crisis.	£5,000 (1 year)
Ivy Wildlife Garden	Funding is towards running costs and to engage with local schools, community groups and residents around water use and conservation.	£1,650 (1 year)
Kandu Arts Community Project CIC	Funding is towards a programme of workshops and wider community engagement to raise awareness of water use and conservation with young people over two years.	£8,470 (2 years)
Rooted Chippenham	Funding is towards installing several rainwater harvesting methods to save water, help provide local produce and reduce reliance on mains water.	£4,000 (1 year)
Wiltshire & Swindon Sports Partnership (WASP)	Funding is towards working with the local GP network to share an interactive map of activities in Chippenham to aid signposting and reduce reliance on prescription drugs therefore limiting the volume of pharmaceuticals entering the water course.	£10,000 (2 years)
Zero Chippenham	Funding is towards a series of public workshops to provide information and encourage take up of water saving and energy efficiency measures and climate change mitigation, to help with the cost of living crisis.	£4,000 (1 year)

# Community Connector Grants - Bridport

Organisation	Project description	Amount
ANRP (Asker Nature Reserve Project)	To create a nature trail between Morrisons and East Street to inform visitors and local people, of the history of Asker Meadows.	£4,850
Bridport Food Matters	The 'We Dig No Dig' project will support the development of 'Incredible Edible' beds in Bridport to address food poverty.	£4,920
Bridport Town Council	Installation of two, wall-mounted, water bottle refill units to reduce the use of single use plastic bottles	£6,000
Dorset Community Action	To support the expansion of the Seed2Plate project which turns unused plots of land into growing spaces for the community – new site at the allotment belonging to local charity Burrough Harmony Centre.	£5,960
Dorset Wildlife Trust	Development of a Citizen Science programme to offer training, equipment and mentoring to local people, and co-ordinate data on the environmental health of Bridport's rivers to inspire behaviour change that will have a positive environmental impact	£5,980
Transition Town Bridport	Rainwater harvesting and watering equipment for the edible gardens at St Mary's School and Bridport School. Family event in the summer at Bridport Primary School to improve understanding of the need of water for growing food.	£1,500
